👤 ABOUT ME

Third-year Computer Engineering student at ENICarthage. With hands-on internship experience and various academic full-stack projects, I specialize in web and mobile development as well as database management. Curious, autonomous, and rigorous, I am passionate about solving complex problems and driving technological innovation.

🎓 EDUCATION

National School of Engineers of Carthage (ENICarthage)

2024 – 2027

Engineering Degree in Computer Science

- Specialization in Software Development and Information Systems.

IPEI EI Manar (IPEIEM)

2022 – 2024

Preparatory Cycle in Physics and Technology

- Successfully completed the National Competitive Exam for Engineering School Entrance.

Technical Baccalaureate

2022

With High Honors

🔧 TECHNICAL PROJECTS AND EXPERIENCE

Development Internship — Uptech

July – August 2025

Design of an After-Sales Service Platform

- Developed an After-Sales Service (SAV) platform centralizing interactions between customers, technicians, and administrators.
- Implemented a secure architecture using Keycloak for authentication.

Angular Spring Boot Keycloak MySQL GitLab

AI Agent for Pull Request Automation

2026 – In Progress

AI-Powered DevOps Automation Agent

- Building an autonomous AI agent that automates the pull request lifecycle: generating PR descriptions, performing automated code review, and flagging potential issues before merge.
- Integrating LLM-based reasoning with the GitHub API to trigger contextual actions (labeling, reviewer suggestions, CI status summaries) directly from repository events.

Python LLM APIs GitHub API GitHub Actions LangChain

Mobile Application — Delivery Supervision

2025 – 2026

Full-Stack Android & Spring Boot

- Real-time delivery supervision (Controller and Agent roles) with a REST API backend.
- Real-time communication via WebSocket/STOMP and statistical dashboards using MPAndroidChart.

Android Studio Spring Boot 3 JWT WebSocket MySQL

Gym Management System

2024 – 2025

Desktop Application (Java)

- Full CRUD interface for managing members, subscriptions, and payments.

Java JavaFX MySQL JDBC MVC

Career & Mentoring Platform — ENICarthage

2025 – 2026

Full-Stack Web Application (Angular + Spring Boot)

- Built a multi-role platform connecting students with job/internship opportunities, Alumni mentors, and professional

events.

- Implemented 3 innovative modules: an Alumni mentoring system with real-time WebSocket messaging, professional events management, and an AI-powered interview simulator providing personalized scoring and feedback.
- Designed a RESTful backend with Spring Boot, JWT authentication, and a multi-role user model (Student, Alumni, Recruiter, Admin) backed by PostgreSQL.

Angular Spring Boot JWT WebSocket MySQL Spring AI REST API

PDF RAG Chatbot

2026

Retrieval-Augmented Generation Document Q&A Assistant

- Built a chatbot that answers natural-language questions grounded in the content of uploaded PDF documents, using Retrieval-Augmented Generation to ground responses and reduce hallucinations.
- Designed the ingestion pipeline: PDF text extraction, chunking, and embedding generation stored in a vector database for efficient semantic search.
- Implemented the retrieval-and-generation flow, feeding the most relevant document chunks into an LLM prompt and returning answers with source references back to the original PDF.

Python LangChain LLM APIs Vector DB (FAISS/Chroma) Streamlit

SKILLS

- **Languages:** Java, TypeScript, JavaScript, HTML5/CSS3, SQL, C/C++, Python.
- **Frameworks & Tools:** Angular, Spring Boot, MySQL, Android Studio, Keycloak, Git, Jira, Postman, Swagger.
- **Soft Skills:** Teamwork, Constructive Communication, Time Management, Rigor.

VOLUNTEERING & ENGAGEMENT

Melkart Junior Enterprise	2025
Project Department Member	
IEEE ENICarthage Student Branch	2024
Technical Event Organization	
ENICarthage Career Forum 8.0	2024
Media & Digital Communication Committee	
Youth Activists	2021 – 2022
Logistical support - COVID-19 Campaign
